Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133)
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b)

Status

- 1) ☒ Responsive to communication(s) filed on 19 March 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 5-10 in the communication of 3/19/03 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2, 4-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Massa (US 4439847).

Massa discloses an underwater wide-band electroacoustic transducer (Figure 2), comprising: a plurality of groups of piezoelectric ceramic units (4, 13, 17, 19), wherein each group of piezoelectric ceramic units has a different dimension (abstract) and separates from each other by different distances (Figure 2), and the frequency response of the piezoelectric ceramic units are banded together to form a wide bandwidth response (Column 1, Lines 5-26); and an acoustic window material for packaging all the piezoelectric ceramic units through a mold injection (Column 2, lines 18-25).

4. With regards to claim 2, Massa discloses the ceramic units being cylindrical (Column 3, Figure 2).

Art Unit: 2834

5. With regards to claims 4 and 5, Massa discloses the transducer inside a molded shape of sound transmitting material to provide efficient acoustic coupling (column 2, Lines 18-25; Column 3, Lines 60-67).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Massa (US4439847).

Massa discloses the claimed invention as described above. However, it fails to disclose the ceramic units that have greater dimensions having a resonance frequency peak at a lower frequency and viceversa.

It would have been an obvious matter of design choice to have the ceramic units with greater dimensions having a resonance frequency peak at a lower frequency and viceversa, since the applicant has not disclosed that this feature solves any problem or is for a particular reason.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
